Pack 3: Full Sun - Medium to Moist Soils

<p>Cardinal Flower <i>Lobelia cardinalis</i></p>			<p>Full sun to partial shade Consistent moist to wet rich soils</p>	<p>Flood management Pollinator support Reduce runoff</p>
<p>Purple Aster <i>Symphyotrichum puniceum</i></p>			<p>Full sun Well-drained moist and rich soils</p>	<p>Pollinator support Resilient Soil management</p>
<p>Allegheny Monkeyflower <i>Mimulus rigens</i></p>			<p>Full to partial sun Consistent moist to wet rich soils</p>	<p>Erosion control Water quality management Biodiversity support</p>
<p>Long-sepal Beardtongue <i>Penstemon calycosus</i></p>			<p>Full to partial sun Moist to wet rich soils</p>	<p>Pollinator support Erosion control Low-maintenance landscaping</p>

Pack 4 : Part Shade - Dry to Moist Soils

<p>Pointed-leaved Tick-trefoil <i>Hylodesmum glutinosum</i></p>			<p>Partial to full shade Rich moist to dry soil</p>	<p>Soil stabilization Biodiversity support Naturalistic landscaping</p>
<p>Tall Thimbleweed <i>Anemone virginiana</i></p>			<p>Partial shade Well-drained dry to moist soils</p>	<p>Soil stabilization Low-maintenance plant Biodiversity support</p>
<p>Large-leaved Aster <i>Eurybia macrophylla</i></p>			<p>Partial to full shade Dry to medium well-drained soils</p>	<p>Attracts pollinators Erosion control Soil protection</p>
<p>Downy Goldenrod <i>Solidago puberula</i></p>			<p>Partial shade Sandy and rocky, nutrient-poor, and acid soils</p>	<p>Attracts pollinators Weed-suppressive groundcover Low maintenance</p>
<p>Hairy Beardtongue <i>Penstemon hirsutus</i></p>			<p>Partial shade Medium-moisture, well-drained soils</p>	<p>Attracts pollinators Soil stabilization Low-maintenance</p>
